Teaching Artist Review

Program Description

Every day more people realize and take actions to create a healthier environment. Let's focus on the positive and share all this knowledge. In this workshop, students will create art pieces from recycled materials, connecting to their environment, and learning about how to use creative self-expression as a method for reducing waste. And at the end of this workshop, Giselle takes all of the students artwork and puts it together to create an art installation for the school to display.

Pricing

Single \$90

Multiple \$80 each

Materials \$25 per class

Installation fee \$410 for design and \$1 per student
